2024 APEC Youth Capacity-Building Training & Model APEC

The "2024 APEC Youth Capacity-Building Training and Model APEC" took place at National Taipei University of Technology from July 4th to 5th. Building on the success of last year's inclusion of international youth, this year's event welcomed 29 young participants from 13 APEC economies, further enhancing regional youth's international perspectives. The program aimed to deepen students' understanding of how APEC operates. A highlight of the program was the "Model APEC" session, where participants assumed the roles of representatives in APEC meetings, presenting proposals on behalf of their respective economies and seeking recognition and endorsements. Participants shared that through the training, they gained valuable experience in formulating policies, conducting diplomatic negotiations, and gained insights into cross-regional politics and economic cooperation.

2024 APEC Industry-Academia Collaboration Workshop: Best Practices for Inclusive Innovation, Digital Sustainability and Cross-regional Talent Development

August 28-29

In response to the APEC focus on emerging industry talent shortages and educational collaboration across the region, APEC IIED hosted the "2024 APEC Industry-Academia Cooperation Workshop" from August 28th to 29th. The event brought together 29 officials and educators from 12 APEC member economies, along with 61 representatives from domestic universities, to share best practices in digital transformation, industry-academia cooperation, and innovative talent development, with the goal of integrating regional resources for sustainable talent development.

The workshop focused on the emerging industries related to digital transformation and explored talent development models to meet the demands of these industries. Topics such as "Fostering Dialogue and Collaboration Between Policy Makers, Industry and Academia for Effective Education and Training Systems" and "Educational Transformation Through AI Empowerment" were discussed. Additionally, participants shared exemplary industry-academia collaboration cases which promote female participation in STEM. These sessions effectively facilitated idea exchange among APEC economy representatives.
